

Chemical Management & Safety Capacity Building Training Beta Testing Opportunity

The [Clean Electronics Production Network \(CEPN\)](#) is **seeking electronics brands and suppliers to participate in free (no cost) in-person beta testing chemical safety training** for workers and management in electronics manufacturing facilities in Vietnam and Malaysia. Beta testing of digital and webinar (live or recorded) is also an available option as part of the training suite. The trainings will be available in English, Malay, and Vietnamese.

Development of this training has been funded by the [Initiative for Global Solidarity](#), a program of the [Deutsche Gesellschaft für internationale Zusammenarbeit \(GIZ\) GmbH](#).

Based on the building blocks of the [Toward Zero Exposure](#) program, the training will disseminate best practices in process chemical management, reduce worker exposures to hazardous chemicals and strengthen worker safety and engagement.

There are 5 modules for workers, 2 modules for managers as well as a manager toolkit for creating facility specific chemical management training – and is available as:

- In person training
- Webinar-based training (either live or recorded)
- Interactive animated digital

Training Overview

For Workers

- Introduction to Process Chemical Safety
- Chemical Safety and Management
- Joint Chemical Safety Committee
- Grievance Reporting Systems
- Worker Surveys on Chemical Safety

For Managers

- Introduction to Chemical Safety Management
- Strategies to Strengthen Worker Engagement in Chemical Safety
- Manager Toolkit for Creating Facility Specific Chemical Management Training

Why participate?

- ✓ **Opportunity for free (no-cost) in-person comprehensive chemical management training** for both workers and managers with a focus on practical application and real examples.
- ✓ **Support the electronics industry** by providing input during the beta testing phase of this important training suite.
- ✓ **Includes a supplier-specific toolkit** for managers to develop facility specific chemical management training.
- ✓ **Prioritize chemical workplace safety** and educate and inform workers and managers about chemical safety.
- ✓ **Enhance industry reputation** by demonstrating commitment to chemical safety and responsible business practices.

When: The beta testing phase of this project will start in early fall 2024.

What we need: We are seeking letters of interest by March 11th to support the grant funding to be able to provide this training at no cost. Please reach out to pbrody-heine@greenamerica.org.
